EDUCATION

University of Massachusetts Amherst, MS in Computer Science | USA GPA: **3.97/ 4.0** Jan 2025 - Dec 2026

Course work: Advanced NLP, Reinforcement Learning, Optimization, Data Science

International Institute of Information Technology Hyderabad, B.Tech in Computer Science July 2017 - Jun 2021

Course work: Data Structures and Algorithms, Distributed Systems, Database systems, Computer Vision, Computer Networks

PROFESSIONAL EXPERIENCE

Snowflake, Software Engineer Intern (Snowpark Container Service) | Bellevue, WA May 2026 - Sept 2026

- Built AWS Spot support for Snowflake container compute, with preemption handling, ondemand fallback, ICE and saving plan aware placement.
- Enabled changing a running compute pool instance type without suspending the pool via rolling replacement during maintenance or on demand

Adobe, Research Extern | Remote, USA (link) | ACL 2026 Feb 2026 - May 2026

- Built a benchmark dataset for attributing answers to text and image evidence in long multimodal documents.
- Developed a training-free multimodal attribution method using selected MLLM attention heads that outperformed VLM/LLM/RAG baselines at $\sim 7\times$ lower latency.

Microsoft, Software Engineer 2 (Azure CoreAI) | Hyderabad, India Jun 2021 - Jan 2025

- Built and scaled **Azure Native Service** integrations for **Datadog** and **Dynatrace**, supporting continuous growth to over **\$100 million** in annual Azure revenue.
- Shipped an **easy trial** for Azure Native ISV partners with seamless log/metrics setup, without impacting existing log forwarding pipelines, increasing **user engagement** (link)
- Designed scalable **multi-subscription monitoring** for Azure Native ISV solutions using a single resource model, cutting cross-subscription setup overhead and driving a **10x** increase in log-flow growth.
- Rearchitected a shared ISV telemetry pipeline processing **2M+** events daily, using Cosmos streams for low-cost storage and pre-running queries via cron into Azure Kusto for faster dashboard/query load times.
- Handled **7 services** as part of Observability Platform team's common on-call rotation.

PROJECTS

Proxy Server | Computer Networks | IIIT Hyderabad Nov 2019 - Dec 2019

- Implemented a multi-threaded HTTP proxy server in Python, that handles and serves requests using sockets.
- Integrated advanced features including request blacklisting and response caching for optimized performance.

Interactive Shell in C | Operating Systems | IIIT Hyderabad Jul 2019 - Nov 2019

- Developed a user-interactive shell in C, implementing the major features of Linux shell like redirection, piping, handling background process.

SKILLS

Languages	C/C++, Python, Java, C#, GoLang, Typescript, Next.js, SQL, Bash
Frameworks and Databases	Node.js, .NET, Knockout.js, JUnit, MySQL, Azure CosmosDB
Tools	Git, Docker, Kubernetes, Jenkins, Grafana
Cloud computing	Azure (Data Factory, Functions, SQL Server), AWS (EC2), Snowflake (SPCS)

PUBLICATIONS

- Battan Neeraj, Agrawal Yudhik, Rao Sai Soorya, Goel Aman, and Sharma Avinash. Glocalnet: Class-aware long-term human motion synthesis. *IEEE Winter Conference on Applications of Computer Vision (WACV)*, 2020.

ACHIEVEMENTS

- Microsoft Mountain Movers Awarded for delivering exceptional team performance
- Dean's List 2 honoree for Academic Excellence 2019-20 at IIIT Hyderabad
- Secured All India Rank 698 in JEE Main, among 1M+ candidates.
